Important Note The information in this section should not be used to diagnose or treat any health condition. If you have or suspect you might have a health problem, you should contact your health care provider. Actrix Technical 2000 uses a two-sided magnetic sheet feeder. In the default configuration, each side of the magnetic sheet feeder supports 24 sheets of material, beginning from the top. Each side supports six different sheets. Actrix Technical 2000 does not automatically rotate the magnetic sheet feeder. You can rotate the magnetic sheet feeder manually using the rotate menu item. Rotating the magnetic sheet feeder can be useful when you have specifications for work on the back side of the sheets that cannot be printed on the front side. The magnetic sheet feeder rotates automatically when you change the printing direction. Toolbar Click the picture in the toolbar to open the toolbar settings dialog box.
